DETAILED ACTION

Double Patenting

Claims 1-16 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 6,935,224.

Although the conflicting claims are not identical, they are not patentably distinct from each other because they are an obvious variation of the patented claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-16 are rejected under 35 U.S.C. 102(a) as being anticipated by KR 2002-0057012.

There is disclosed in the Korean reference a bread maker, comprising: upper and lower kneading drums 11, 13 holding upper and lower parts of a mixing bag 7; a driver 26, 27 rotating the kneading drums in two directions; a baking tray 15 having a slit defined by the tray being formed of two parts; an oven compartment 10; a controller 70 for the driver; a rotation sensor 30; and a pair of dough-blocking members 17. All of the claimed structural limitations have been met by the prior art reference.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hedenberg '009.

Art Unit: 1761

There is disclosed in Hedenberg a bread maker comprising; upper and lower kneading drums, a mixing bag, a driver for the drums, a baking tray, an oven compartment and controller (microprocessor, not shown) and rotation sensor (barcode reader, not shown). See column 5.
